THE ASID WHY STATEMENT

ASID advances the profession and communicates the impact of interior design to enhance the human experience.

CORE VALUES AND STRATEGIC GUIDEPOSTS

ASID leads collaboration with those working to promote the value of interior design.

ASID prepares its members to excel in a dynamic and evolving profession competing in a global marketplace.

ASID advances the profession by generating, collecting, and disseminating applied knowledge.

OVERALL VISION

Demonstrating and communicating the impact of design on the human experience is central to the design of the new ASID headquarters. Our space is the embodiment of who we are as a Society. The office is designed with health, wellness, well-being, and sustainability as a central organizing principle. The goal is to use the office as a living laboratory that connects interior design solutions to the occupant's productivity, engagement, retention, and innovation. ASID is investing resources, through the ASID Foundation, into pre- and post-occupancy research to build on the body of knowledge that supports the impact of design.

ASID Headquarters is open to tours and events and looks forward to sharing our story with the world.

WELL

WELL believes that buildings should be developed with people's health and wellness at the center of design. The WELL Building Standard®, administered by the International WELL Building Institute® (IWBI), is an evidence-based system for measuring, certifying, and monitoring the performance of building features that impact health and well-being.

WELL is grounded in a body of medical research that explores the connection between the buildings where we spend more than 90 percent of our time, and the health and wellness impacts on us as occupants. WELL Certified™ developments can help create a built environment that improves the nutrition, fitness, mood, sleep patterns, and performance of its occupants.

By placing people at the heart of design, construction, operations, and development decisions, we have the ability to add meaningful value to real estate assets, generate savings in personnel costs, and enhance the occupant's health and well-being.

WELL features are categorized as either Preconditions—necessary for baseline WELL Certification, or Optimizations—optional enhancements, which together determine the level of certification above baseline certification. Certification levels include Certified, Silver, Gold, and Platinum.

LEED

LEED, or Leadership in Energy and Environmental Design, is a certification program for buildings and communities that guides their design, construction, operations and maintenance toward sustainability. It's based on prerequisites and credits that a project meets to achieve a certification level: Certified, Silver, Gold and Platinum.

LEED certification means healthier, more productive places, reduced stress on the environment by encouraging energy and resource-efficient buildings, and savings from increased building value, higher lease rates, and decreased utility costs.

THE 7 MAJOR PRINCIPLES OF THE WELL BUILDING STANDARD¹

AIR

Optimize and achieve indoor air quality

How: Remove airborne contaminants, prevent, and purify

WATER

Optimize water quality and accessibility for drinking

How: Remove contaminants through filtration and treatment

NOURISHMENT

Encourage healthy eating habits

How: Provide healthy food choices, behavioral cues, and knowledge about nutrient quality

LIGHT

Circadian lighting, light output controls, and window design

How: Minimize disruption to the body's circadian rhythm

FITNESS

Encourage physical activity with opportunities to move around

How: Utilize building design technologies and knowledge-based strategies

COMFORT

Soothing, distraction-free environment with acoustic and thermal controls

How: Provide barriers to prevent outside noise

MIND

Support mental and emotional health

How: Provide quiet spaces for breaks

OUR PARTNERS

PERKINS+WILL

Perkins+Will is an interdisciplinary, research-based architecture and design firm established in 1935 and founded on the belief that design has the power to transform lives and enhance communities. Each of the firm's 24 offices focuses on local, regional, and global work in a variety of practice areas. With hundreds of award-winning projects annually, Perkins+Will is highly ranked among top global design firms. Perkins+Will is recognized as one of the industry's preeminent sustainable design firms due to its innovative research, design tools, and expertise. The firm's 1,800 professionals are thought leaders in developing 21st century solutions to inspire the creation of spaces in which clients and their communities work, heal, live, and learn. Social responsibility is a fundamental aspect of Perkins+Will's culture and every year the company donates 1% of its design services to pro bono initiatives. In 2015, Fast Company ranked Perkins+Will among "The World's Top 10 Most Innovative Companies in Architecture."

Located in the heart of the nation's capital, the Washington, D.C. office is a diverse practice delivering thoughtful, transformative, client-focused solutions. As a leader in the marketplace, our client roster includes institutional, corporate, government, and individual leaders who are on the forefront of building and shaping our region.

For more information, visit www.perkinswill.com.

Savills Studley is the leading commercial real estate services firm specializing in tenant representation. Founded in 1954, the firm pioneered the conflict-free business model of representing only tenants in their commercial real estate transactions. Today, supported by high quality market research and in-depth analysis,

Savills Studley provides strategic real estate solutions to organizations across all industries. The firm's comprehensive commercial real estate platform includes brokerage, project management, capital markets, consulting and corporate services. With 30 offices in the U.S. and a heritage of innovation, Savills Studley is well known for tenacious client advocacy and exceptional service.

The firm is part of London-headquartered Savills plc, the premier global real estate service provider with over 30,000 professionals in over 700 locations around the world. Savills plc is listed on the London Stock Exchange (SVS.L). [For more information, please visit www.savills-studley.com.](http://www.savills-studley.com)

Carr Properties is a privately held real estate investment trust focused on creating value for its shareholders through the ownership, acquisition, and development of high-quality office properties in the

greater Washington, D.C. area. The company maintains ownership of 17 commercial office properties totaling over 4 million SF as well as four major development properties – Midtown Center in Washington, D.C. (former headquarters of The Washington Post); the Apex site in Bethesda, Maryland; 2311 Wilson Boulevard in Arlington, Virginia; and 2025 Clarendon Boulevard in Arlington, Virginia. Upon completion, these projects will add an additional 2.15 million SF of trophy-quality office space to the company's portfolio. Carr Properties is continuing to expand its portfolio through strategic investments in the Washington, D.C. area. [For more information, please visit our website at carrproperties.com.](http://carrproperties.com)

Linda Rabbitt founded rand* construction in 1989, and was one of only a few women in the industry at that time. What started as

a small firm in Arlington with seven employees has now grown into a national operation with revenues exceeding \$300 million annually. rand* construction specialize in ground-up construction, building renovations, historic restoration, and interior build outs. Our success and solid reputation as a dependable, award winning Metro-D.C. area contractor has enabled us to grow our business across the United States. Additionally, we are honored to be recognized annually by the Washington Building Congress, the Associated Builders and Contractors, and the National Association of Industrial and Office Properties. rand* is also extremely proud to have been recognized since 2004 as a 'Best Places to Work' by The Washington Business Journal and The Washingtonian. [Learn more at randcc.com.](http://randcc.com)

Gary Fisher found painting in mid-life, and creates from his studio in Rehoboth Beach, Delaware while maintaining a small studio in Washington, D.C. Fisher is one of the

founders of the Mid-City Artists Group, and his artwork ranges from textural abstract work to brilliantly colored luscious still life paintings. Sondra N. Arkin is a Washington, D.C. painter and curator and a member of Mid City Artists. Her media include painting, printmaking, and sculpture. Arkin provided the sculptural piece in the new ASID headquarters. Much of her work is in modular sculptural installations, forming "lines in space" from common building materials that work with air, light, and shadow. ASID is excited about our partnership with Mid City Artists and with the opportunity to showcase the work of local artists. We will refresh the artwork in our office every six months. [Learn more at midcityartists.com.](http://midcityartists.com)

OUR CONSULTANTS

BENYA BURNETT CONSULTANCY

BENYA BURNETT is a professional lighting and epigenetic consulting practice founded by James Benya and Deborah Burnett. Located in Davis, California, we provide consulting services throughout North America and the world. Lighting related services include a wide range of lighting and daylighting project and consulting work including site evaluation, design and specifications, expert research and testimony, education and teaching, technical writing, and product development. [Learn more at benyaburnett.com](http://benyaburnett.com).

Cerami

Cerami & Associates is comprised of acoustical, audiovisual, and technology design consultants working together as one team. We focus our collective expertise, experience, and commitment to help our clients make the best decisions for their projects. Our experience provides us with the background expertise needed to provide comprehensive acoustical and technology consulting services on projects of any size or project type. Cerami has provided consulting services for projects such as Covington & Burling at City Center, multiple parcels at the Wharf Development on the Southwest Waterfront, and Dinosaur Hall at the Smithsonian National Museum of Natural History. [Learn more at ceramiassociates.com](http://ceramiassociates.com).

TERRAPIN BRIGHT GREEN

We believe that reconnecting people with the environment will lead to a healthy, prosperous, and regenerative future for all. We leverage high-performance design, whole systems thinking, and research in biophilic design, bioinspired innovation, and ecological design to make this goal a reality. This breadth of work and experience enables us to develop creative, impactful solutions for our clients. [Learn more at terrapinbrightgreen.com](http://terrapinbrightgreen.com).

teknion

Teknion designs products that fit a diversity of people, cultures, physical spaces, and modern work practices. Furniture that works wherever you work. Teknion leverages the power of design to enhance the way people work, meet, and interact. Their versatile and integrated portfolio of furniture products supports collaborative spaces and those where people work alone. Their products respond not only to the physical and philosophical character of a workplace, but also to essential human needs and behaviors: the need to be toxic free with materials, the need to sit and to stand, to seek privacy and community, to find respite and inspiration, and to eliminate chemicals of concern from the products and the supply chain. DESCRIPTION	PRODUCT	CERTIFICATION(S)
High Pressure Laminate	General Purpose Laminate w/ ARP "Armored Protection" Technology Thru-color "color thru" laminate – no black edge	Greenguard Greenguard Gold FSC NSF

PERFORMANCE. NEVAMAR® HPL is the brand name for our line of durable, high performance, high pressure laminates (HPL). NEVAMAR® HPL continues its long-standing tradition of design and technical innovation featuring a broad selection of quality products.

NEVAMAR® HPL also features our exclusive Armored Protection (ARP®) that resists wear and keeps our laminates looking new longer. For over 30 years, Nevamar Armored Protection® has been recognized as a performance standard among decorative high pressure laminates. Every day, Nevamar with ARP® proves its toughness in schools, hospitals, hotels, restaurants, airports, retail shops and other commercial environments. With Armored Protection, Nevamar® laminate has more than twice the wear protection than standard laminate (ANSI/NEMA LD3 test method).

DESCRIPTION: HPL is composed of layers of kraft paper, a single layer of decorative paper with a solid color or design, and finished with a protective layer that can have printed design accents or other decorative features. Our NEVAMAR® line comes in a wide assortment of treatments designed to withstand fire, chemicals, abrasions and the general wear and tear of high traffic areas.

APPLICATIONS: NEVAMAR® HPL is the surface solution of choice for high-use applications on surfaces in hospitals, stores, hotels, offices, lobbies, restaurants, and educational institutions.

ENVIRONMENTAL FEATURES:

- Greenguard & Greenguard Gold Certifications
- Our products are manufactured with recycled or renewable paper sources to help preserve our forests and promote a healthier environment.
- Distribution centers are strategically located across the country to reduce the use of fossil fuels when delivering Nevamar products.
- Nevamar HPL surfaces do not support bacterial growth, an ideal choice for healthcare, education and food service installations

CHOICES: 67 solid colors, 67 wood grains, 140 abstracts, 20 finishes

MAKING CARPET TILE FROM OLD FISHING NETS

The Net-Works program enables fishing communities in developing countries to sell discarded fishing nets back into a global supply chain and provides a continuous source of recycled materials for use in carpet tile production. Local residents have so far collected more than 80 metric tons of discarded fishing nets for reuse that would otherwise damage the oceans. The project follows Interface's strategy to turn waste into a raw material and, in turn, establish a community-based supply chain and create local jobs.

Net-Works is the latest element supporting Interface's Mission Zero goal to source 100% recycled material for its carpet tile by 2020. By 2014, Interface sourced 50% of its raw materials from recycled or bio-based materials.

WHY A SUSTAINIA100 SOLUTION?

Abandoned, lost, or discarded fishing gear in the oceans makes up around 10% of all marine litter. Abandoned fishing nets are the main cause of ghost fishing, where nets lost or no longer in use wreck reefs and trap and entangle big and small fish. By collecting the discarded nets, the partnership protects the natural environment while providing jobs for local residents.

Chief is a division of Milestone AV Technologies. With over 35 years of proven product and service excellence, hundreds of product awards and patented designs, they are globally recognized as an AV industry leader. Kohler Kitchen & Bath, a division of Kohler Company, has been a leading manufacturer of bath products since 1873, but the bath was just the beginning. Today, they have an extensive product portfolio for both bath and kitchen products including faucets, sinks, toilets, showerheads, and the necessary accessories to bring the whole room together. Introducing the future of clean with their impeccable designs and personalized comfort for their customers, Kohler has remained an industry leader. [Visit us.kohler.com](http://us.kohler.com) to learn more about Kohler’s continued innovation and diverse collections.

KOHLER KITCHEN & BATH PRODUCTS UTILIZED AT ASID HEADQUARTERS:

DESCRIPTION	PRODUCT	CERTIFICATION(S)
Plumbing Fixture, Sink	1) Undertone Sink K-5290-NA (1) Toccata Sink K-4011-4-NA	ADA Compliant
Plumbing Fixture, Faucet	(1) Simplice Faucet K-596-CP (1) Simplice Faucet K-597-CP	ADA Compliant
Plumbing Fixture, Soap Dispenser	(2) Soap Dispenser K-1995	ADA Compliant
Plumbing Fixture, Water Closet and Valve	(8) Kensington Water Closet K-4325 with K-4731-C Seat (8) Tripoint Flush Valve K-10956-C	High Efficiency Toilet (HET)
Plumbing Fixture, Urinal and Valve	(2) Bardon Urinal K-4904-ET (2) Tripoint Flush Valve K-10949-CP	High Efficiency Urinal (HEU)

Armstrong, one of the largest design manufacturers of floor and ceiling systems, established a foundation that was built on trust and a commitment to their partners. With a product portfolio that accommodates homes, work spaces, hospitals, classrooms, stores, and restaurant environments, Armstrong provides interior design solutions that support comfort, save time, and improve building efficiency and overall performance across the globe. [To learn more, visit armstrong.com.](http://armstrong.com)

ARMSTRONG PRODUCTS UTILIZED AT ASID HEADQUARTERS:

DESCRIPTION	PRODUCT	CERTIFICATION(S)
Acoustical ceiling tile	Ultima	c2c, bronze, V2
Acoustical ceiling tile	Optima	Declare – LBC Compliant
Ceiling Grid	9/16” Interlude XL	Declare – LBC Pro List Free

Washington Group Solutions (WGS) has provided commercial and government workspace solutions to clients in the Mid-Atlantic region for over 20 years. Our mission is to treat our clients with the highest level of honesty, respect, and integrity. Our experienced and energized team strives to understand our clients' business and listen to their priorities. Knowledgeable staff, quality products, and responsive services enable us to create environments that are functional and flexible, adapting to the evolving needs of today's office environments. Over the past five years, WGS has been listed among the Top 10 Largest Office Furniture Dealers in the region and "Best Places to Work 2013" in the Washington Business Journal. WGS strives to provide furniture solutions that work for our clients on time, on budget, every time! Our extensive product line of over 150 manufacturers can meet every budget, function, and aesthetic requirement for your business, school, hospitality, or health profession. Bernhardt	Credenza, Conference Table, Conference, Mobile
Davis	Chair, Bench Chair, Conference Chair, Dining, Barstool, Bar Height Chair, Lounge
HBF	Chair, Dining, Barstool, Bar Height Chair, Lounge Table, Occasional, Laptop & Coffee
Herman Miller	Chair, Conference Storage, Bookcase with Common top Table, Conference
OFS	Table, Conference Carolina Mile Marker Lockers

reDISTRICT, a Virginia based, minority owned small business serving the National Capital region with quality commercial office furnishings, interior design and project management services. As a full service FF&E firm, reDISTRICT represents Steelcase, as well as many other manufacturers of quality office furniture. reDISTRICT achieves a 98.9 % service satisfaction rating among our client base as a result of our commitment to turnkey project management and solutions. [Learn more at re-District.com](https://re-District.com).

MANUFACTURER	PRODUCT DESCRIPTION(S)
Steelcase	Chair, Bench, Ottoman Chair, Task Office, Private Table, Occasional, Paper
Coalesse	Sofa, 3-Seat

TURNKEY IMPLEMENTATION OF PRODUCTS AND SERVICES:

- Furniture Procurement
- Furniture Reconfiguration
- Inventory & Asset Management Services (Including RFID Tagging & Tracking)
- Transition Planning (Move Coordination & Management)
- Structured Cabling (Design, Procurement and Installation)
- PC Disconnect & Reconnect
- Project Management
- Audio Video and VTC (Design, Procurement and Installation)
- Artwork Procurement
- Computer Aided Facilities Management Services (CAFM)
- Furniture Rental
- Space Planning and Design Services
- Disposal Services (DRMO and Excess)
- Warehousing & Storage
- Carpet Procurement and Installation
- Mover Services
- Telework Reservation Systems
- Appliance Procurement
- Signage Design and Procurement
- Demountable Wall Systems
- Window Treatments
- Modular Swing Space Buildings

COMPANY DESIGNATIONS:

NAICS Codes: 423210, 337127, 337211, 337214, 337215, 541410
Federal EIN: 26-0715295
DUNS: 80-696-1103
Cage Code: 6Y5G2

CERTIFICATIONS:

- 8(a) Certified through 10/07/2024
- Minority Business Enterprise
- Small Disadvantaged Business
- GSA Schedule Packaged Office
Contract: GS-27F017CA

Acoustical Interiors, Inc. is a dealer and distributor of specialty acoustical products dedicated to improving workplace performance. Their professionals consult with customers in order to determine the products best suited to their specific project's confidentiality issues, speech privacy concerns, occupant comfort, productivity desires, and/or aesthetic matters. Acoustical Interiors Inc.'s mission is to provide their clients and allied organizations with acoustical products that provide long-term value, while focusing on individualized service, attention to detail, and overall customer satisfaction. [To learn more visit acoustical-interiors.com](https://acoustical-interiors.com).

MANUFACTURER	PRODUCT DESCRIPTION(S)
LogiSon® Acoustic Network	Sound Masking System

MCX LIBRARY

MCX Material Connexion®

A CURATED COLLECTION OF HEALTHY, SUSTAINABLE, AND INNOVATIVE MATERIALS

Healthy Materials The category of ‘healthy materials’ is different from the category of ‘sustainability’ in that it considers the built environment (where we work, play, and live) and its effect on people, primarily in addition to its effect on the planet as a whole.

Healthy materials go beyond a base-line level of ‘non-toxic’ ingredients and actively promote a more healthful environment either actively, such as by NOx reduction or moisture management, or passively, by reducing ambient noise levels or promoting relaxation with biophilia.

These materials include high porosity wall surfaces that absorb and expel moisture depending upon the ambient environment; self-cleaning surfaces that through catalytic effects break down organic pollutants; treatments to materials that reduce or remove their need for protective coatings or stains; innovative products that do not need thick or rough surfaces to achieve excellent sound absorption performance; and transparent glazing that decreases heat and damaging radiation from the sun while offering excellent light transmission.

Beyond the actively healthy material solutions, increased transparency about the chemistry of our materials and products means that we can source and specify solutions for interiors with full knowledge of our materials choices along with their short and long term effects. This puts the control, and responsibility, for the quality of our interior spaces and the occupants’ needs firmly back in the hands of the designer.

At least 75 percent of the ASID Material Connexion Library contains materials that have met the rigorous standards established by the following programs:

Eligible for BIFMA Level® Points A third-party assessment of the social, energy, material selection, and human and ecosystem health impacts of furniture products in the built environment, verifying how a product has met the ANSI/BIFMA e3 Furniture Sustainability Standard.

Eligible for LEED Points Materials that potentially contribute points toward LEED certification.

Cradle to Cradle The Cradle to Cradle Certified™ Product Standard guides designers and manufacturers through a continual improvement process that looks at a product through five quality categories — material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness.

Greenguard GREENGUARD Certification helps manufacturers create and buyers identify interior products and materials that have low chemical emissions, improving the quality of the air in which the products are used.

Rapidly Renewable Rapidly renewable materials are natural, non-petroleum-based building materials that have harvest cycles under 10 years, such as bamboo, straw, cork, natural linoleum products, wool, wheatboard, strawboard, etc.

Recycled Content The incorporation of material into a product that comes from pre- or post-consumer sources, either from the same product type or from other sources, as differentiated from ‘virgin’ materials.

Wood Stewardship Certifications FSC and PEFC Wood and wood products that have been certified according to the two largest international forest certification programs: Forest Stewardship Council (FSC), and the Programme for the Endorsement of Forest Certification (PEFC). Chain of Custody certification tracks the certified material through the production process – from the forest to the consumer

- including all successive stages of processing, transformation, manufacturing, and distribution. It provides evidence that certified material in a certified product originates from certified forests.

In addition, our “healthy materials” collection features over 300 cutting-edge materials in eight categories, including the largest selection of sustainable materials and the only Cradle to Cradle materials samples in the world. These are catalogued as follows:

Carbon-based Materials whose main constituent is carbon in the form of diamond, graphite, buckyballs, nanotubes, or carbon fiber.

Cement-based Composites of Portland or other cement with additives such as sand, glass, metal fibers, or other aggregates.

Ceramic A molecular combination of a metal such as aluminum or zinc, and a nonmetal such as oxygen or carbon to create durable, heat-resistant, and electrically insulating materials.

Glass Amorphous or crystalline structures of ceramics based upon silicon and oxygen (SiO₂) that are transparent or translucent.

Metal A single metallic element or combination of metallic and other elements (alloy) that produces ductile, durable, electrically and heat-conductive materials that tend to reflect light.

Natural A material that has been grown or mined from the earth.

Polymer Long chain molecules, mostly carbon-based, which are synthetic, moldable, colorable and lightweight.

Processes A manufacturing method to combine, deposit, form, foam, or otherwise manipulate a material.

Supported by the American Chemistry Council, 2016.
