

Design / T – Design Symposium and Industry Trade Show

SEE INNOVATION - Planetarium Show 5:15-6:00PM

See **WONDERS OF THE NIGHT SKY** in the NEW Jennifer Chalsty Planetarium. It is the largest planetarium in the Western Hemisphere. Only four others in the world—two in Japan, one in China and one in Russia—are bigger. The new planetarium boasts a resolution of 88 million pixels, a lighting system that can produce over 281 trillion individual colors, and new speakers capable of producing 30,000 watts of digital sound. Join us and experience the 89-foot full-dome view of the night sky and distant galaxies.

LSC's **ALL-LIVE SIGNATURE SHOW, *Wonders of the Night Sky*** is an exhilarating experience that explores our stars and beyond. See the galaxy as it appears to the naked eye, as well as through the eyes of NASA's robot probes, of the Hubble Space Telescope, and arrays of telescopes from around our planet. A portion of the show is set aside to include the latest breaking news in astronomy and aerospace, taking full advantage of LSC's new Digistar 6 full dome system, which allows seamless passage from the night sky to another planet to the heart of another galaxy.

The Planetarium show is included in the following Ticket Types:

- **BE INSPIRED – All Access Pass (8:30am-Closing)**
- **SEE INNOVATION – (1:00pm-Closing)**
